

Video Technique Demonstrations

Developed for the professional hair colorist, Chromastics has been designed to return control of the hair coloring service to the colorist.

In this area of our web site, you may purchase an online subscription which will allow you to gain access to our membership area, where we feature video trainings that may be viewed online from the convenience of your desktop — or laptop — computer.

Access to each segment is granted for a 2-week period. Pay only for those videos whose topic(s) you are interested in learning about. What better way to learn about these advanced techniques than from the founder of Chromastics, Tom Dispenza!
